PROFESSIONAL SUMMARY

B.Tech Data Science student with hands-on experience in Python, data analysis, and full-stack web development. Skilled in developing data-driven applications and solving real-world problems through technology, with a focus on practical, real-world impact. Seeking opportunities to apply and expand skills through collaborative projects, and continuous learning in data science and software engineering.

EDUCATION

Noida Institute of Engineering and Technology <i>B.Tech – Data Science, Greater Noida, Uttar Pradesh</i>	<i>July 2023 – July 2027</i> CGPA: 8.12/10.0
Chauhan Public School <i>Senior Secondary (12th), Bhagalpur, Bihar</i>	<i>2020 – 2022</i> Percentage: 72%
St. Joseph's School <i>Secondary (10th), Banka, Bihar</i>	<i>2020</i> Percentage: 86%

TECHNICAL SKILLS

Languages: Python (Primary), SQL, TypeScript, Java, C
Data Science & AI: Pandas, NumPy, Matplotlib, Scikit-learn, OCR, Local LLMs (Ollama)
Web Development: Next.js, React.js, Flask, Tailwind CSS, REST APIs
Databases & Cloud: MySQL, Supabase, AWS (Cloud Architecting)
Tools: Git/GitHub, Linux/Unix, Data Structures & Algorithms

PROJECTS

NewsFlow – Personal RSS News Aggregator Live Link	2025
- Architected a full-stack news platform ingesting 500+ articles daily from 20+ RSS feeds with sub-200ms load times via optimized Supabase queries. - Delivered a fully responsive reading experience across all screen sizes using Next.js and Tailwind CSS. Tools Used: Next.js, Supabase, Tailwind CSS, TypeScript.	
SpendSenseAI – AI-Powered Personal Finance Tracker GitHub Link	2025
- Engineered an end-to-end AI pipeline using OCR and local LLMs (Ollama) to extract, clean, and classify 95%+ of transactions from raw bank statements automatically. - Automated expense categorization across 10+ spending types, cutting manual data entry time by 80% and generating personalised monthly spending reports. Tools Used: Python, OCR, LLM-based Classification, Ollama.	
Voice-Controlled Transport Inquiry System	2024
- Built a voice-enabled transport query system integrating speech recognition with an SQLite database of 100+ routes, returning results in under 2 seconds. - Designed a Tkinter GUI that reduced user interaction from 5 manual steps to a single voice command. Tools Used: Python, SQLite, Speech Recognition, Tkinter.
