PROFESSIONAL SUMMARY

B.Tech Data Science student with hands-on experience in Python, data analysis, and full-stack web development. Skilled in developing data-driven applications and solving real-world problems through technology, with a focus on practical, real-world impact. Seeking opportunities to apply and expand skills through collaborative projects, and continuous learning in data science and software engineering.

EDUCATION

Noida Institute of Engineering and Technology <i>B.Tech – Data Science</i> , Greater Noida, Uttar Pradesh	<i>July 2023 – July 2027</i> CGPA: 8.20/10.0
Chauhan Public School <i>Senior Secondary (12th)</i> , Bhagalpur, Bihar	<i>2020 – 2022</i> Percentage: 72%
St. Joseph's School <i>Secondary (10th)</i> , Banka, Bihar	<i>2020</i> Percentage: 86%

TECHNICAL SKILLS

Languages: Java, Python, C, ANSI SQL, JavaScript, TypeScript
Backend Development: Spring Boot, JDBC, REST APIs, Maven, Flask
Frontend Development: Next.js, React.js, HTML5, CSS3, Tailwind CSS
Databases: MySQL, SQLite, Supabase
Data Science & AI: Pandas, NumPy, Matplotlib, Scikit-learn, OCR, Ollama (Local LLMs)
Tools: Git, GitHub, Linux/Unix, IntelliJ IDEA, VS Code
Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, OS

PROJECTS

NewsFlow – Personal RSS News Aggregator Live Link GitHub Link	2026
- Architected a full-stack news platform ingesting 500+ articles daily from 20+ RSS feeds with sub-200ms load times via optimized Supabase queries. - Delivered a fully responsive reading experience across all screen sizes using Next.js and Tailwind CSS. Tools Used: Next.js, Supabase, Tailwind CSS, TypeScript.	
Transport Enquiry Management System – TEMS Live Link GitHub Link	2026
- Developed a full-stack transport management platform enabling users to search routes, manage bookings, and access transport information through a responsive web interface backed by Spring Boot REST APIs. - Designed a scalable backend using layered architecture with SQLite persistence, implementing CRUD operations, input validation, and efficient data access using Spring Data JPA. Tools Used: Java 21, Spring Boot, SQLite, Spring Data JPA, Maven, HTML, CSS, JavaScript.	
SpendSenseAI – AI-Powered Personal Finance Tracker GitHub Link	2025
- Engineered an end-to-end AI pipeline using OCR and local LLMs (Ollama) to extract, clean, and classify 95%+ of transactions from raw bank statements automatically. - Automated expense categorization across 10+ spending types, cutting manual data entry time by 80% and generating personalised monthly spending reports. Tools Used: Python, OCR, LLM-based Classification, Ollama.
